

Q.1 How should users navigate between pages?

Answer:

- User can navigate using Hyperlinks, button, menu and search bar.
- Users can move around the website by clicking on a menu at the top of the page.
- Users can navigate by adding a Back to Top button on long pages is like a shortcut for users.

Q.2 How will it be possible to find a specific book? Think of all possible alternatives and select at least two. Justify your choices.

Answer:

To find specific book:

- Users can use search bar prominently on the homepage and book collection pages allows users to directly search for a specific book by title, author, or genre.

Search bars provide a quick and efficient way for users who know what they are looking for, reducing the time it takes to find a specific book.

Filter and Sorting Option

- Users can filters and sorting options on the Book Collection page. Users can filter books by genre, author, or availability and sort them based on relevance, alphabetical order, or popularity.

Filters and sorting options offer a systematic way for users to browse through the book collection based on their preferences, making the search process more organized and user-friendly
